Allowable Subject Matter

1. Claims 1-10 is allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include an imaging optical system comprising in order from the object side: a first positive meniscus; aperture stop; third positive lens wherein the object side is an aspherical surface having curvature which is lowered toward a marginal portion of the aspherical surface and an image side surface of the third lens is an aspherical surface having curvature which is enhanced toward the marginal portion of the aspherical surface as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sato (US 6,804,067) discloses a single focus lens.

Art Unit: 2873
